

RESURFACE TECHNOLOGIES

NEW PRODUCT LINE

Many of you realise that we sell a lot of good quality preowned SMT equipment.

We also offer and support/install/warranty a range of high quality NEW equipment from many suppliers.

We are now pleased to offer a range of PCB cleaning systems from our manufacturer in Europe.

Two models are available, a bench-top style unit and a floor-standing unit.

Both units operate on De-ionized water and are supplied as complete systems with cartridges and saponifiers.

If you need to clean those NO CLEAN fluxes and water based pastes then these units will do the job.

Please feel free to contact us for further info specs and pricing.
